Profile

Full-Stack Software Engineer with 5+ years of experience building scalable backend systems and web applications using Java, Spring Boot, React.js, Next.js, and TypeScript.

Strong background in distributed systems, event-driven architecture, Kafka, AWS, and REST APIs, with hands-on experience across frontend, BFF, backend development, deployment, monitoring, and production support.

Experience

Sysco LABS Sri Lanka

Technology center of Sysco Corporation, a Fortune 100 company serving 730,000+ customer locations across North America.

Associate Technical Lead

Aug 2024 – Apr 2026

- Owned 9 Java/Spring Boot microservices end-to-end, supporting 2,000+ daily orders and 100,000+ daily product, inventory, and customer updates.
- Replaced in-memory queues with Amazon SQS, eliminating file-loss risks and reducing manual recovery effort by 70% across 2,000+ files/day at 17 sites.
- Refactored the CanBuy domain into independently scalable services, supporting 60,000+ product-list updates/hour.
- Owned production operations and resolved 10+ major incidents using Datadog APM, distributed tracing, and centralized logging.
- Migrated owned production services to Spring Boot 3 and Java 21 with zero downtime.
- Implemented features for **Dobby UI**, an internal support and troubleshooting platform used to investigate and resolve Shop platform issues.

Senior Software Engineer

Aug 2022 – Aug 2024

- Designed Kafka integration platforms with reusable producer/consumer patterns and fault-tolerant processing across distributed services.
- Optimized the Pricing API using granular Redis caching, reducing peak latency from 1,200 ms to 750 ms P95 at 60 TPS.
- Designed Retry REST/HTTP APIs and service integrations across Shop Java/Spring Boot microservices with AWS Lambda.
- Maintained 90%+ automated test coverage using JUnit, Mockito, integration testing, and TDD.
- Contributed to **Dobby UI** by developing frontend features using Next.js and TypeScript for Shop platform workflow monitoring and troubleshooting

Software Engineer

Feb 2021 – Aug 2022

- Delivered 80% of the backend for the NCOB customer onboarding platform, supporting 8,000+ customers.
- Built REST APIs and backend workflows integrating Salesforce, PostgreSQL, and AS400 systems.
- Designed ER diagrams and API specifications and documented onboarding flows, API usage, and SonarQube integration.
- Developed frontend, bff, and backend features for NCOB using React.js, TypeScript, and Spring Boot, contributing across the application stack.

Software Engineer Intern

Jun 2019 – Dec 2019

- Contributed to developing a proxy API for third-party POS integrations using Spring Boot, WebFlux, Java 11, and AWS.
- Evaluated Tyk and Kong API gateways for rate limiting, plugins, transformation, and monitoring.

Technologies

- Programming:** Java 11/17/21, TypeScript, JavaScript, Python
- Backend:** Spring Boot, Spring Batch, REST/HTTP APIs, Gradle, Microservices
- Messaging:** Apache Kafka, Confluent Kafka, IBM MQ, Amazon Kinesis, Amazon SQS
- Cloud & DevOps:** AWS, Docker, Terraform, CloudFormation, ECS, Fargate, Lambda, EC2, RDS, S3
- Databases:** PostgreSQL, SQL, MongoDB, Redis
- Architecture:** Distributed Systems, Event-Driven Architecture, Integration Platforms, DDD, Microservices
- AI-Assisted Development:** Cursor, Structured Prompting, AI-Assisted Coding
- Testing & Quality:** JUnit, Integration Testing, TDD, SonarQube, Veracode
- Monitoring:** Datadog, CloudWatch, APM
- Frontend:** Next.js, TypeScript, JavaScript
- Development Practices:** Agile, Scrum, CI/CD, Production Support
- Operating Systems:** Linux/Unix (Ubuntu), Windows

Education

- B.Sc. (Hons.) in Computer Science and Engineering** 2016 - 2021
- University of Moratuwa, Sri Lanka*

Professional Activities

- Sysco LABS Hall of Fame Unit Award (USFS)** Sep 2023
- Recognized for contributions to high-impact engineering initiatives and business outcomes.

Stack Overflow
6,483 reputation, 157 technical answers, **3.7M+** content reach, **100+** Java tag score through professional experience, and **100+** Python tag score from university and personal projects.

Technical Writing
Published **100+** technical articles covering Java, Spring Boot, Kafka, distributed systems, and software architecture, reaching **2,100+** followers. Multiple articles exceeded **50,000 reads**, with one surpassing **140,000 views**.
